Hohenstein Hong Kong Laboratory

**Rethink.
Response.
Responsibility.**

Maximum Added Value with German Expertise.

10,000 customers worldwide profit from the expertise of Hohenstein employees at the headquarters in Germany and our global network of offices in over 40 countries.

Our cutting-edge test laboratory in Hong Kong Science Park is fully accredited in compliance with DIN EN ISO/IEC 17025 by the German National Accreditation Body DAkkS.

Successful and reliable client support requires excellent employees and effective methods. We place great emphasis on the ongoing training of our staff according to our German commitment to quality, independence and neutrality.

Our expert team in Hong Kong offers a diverse range of tests and services for all major textile production of raw, semi-finished, and finished textile products at a competitive price.

Independence and neutrality are the basis of our globally recognized testing system.

We look forward to sharing our deep, interdisciplinary expertise with you and your supply chain, and serving you with our customized service and reliable quality.

Prof. Dr. Stefan Mecheels
CEO Hohenstein

Dr. Christopher Au
Managing Director
Greater China

The worldwide Hohenstein expert team is highly devoted to quality, delivering fast, precise and absolutely neutral test results to our clients.

We Believe in the Fascinating Possibilities of Textile Innovation for both People and the Environment.

There are no products that we are in closer daily contact with than textiles. It is important that they not only look good – but also fit well, offer optimal performance and, of course, should not contain any harmful substances.

We ensure this with testing, certification, research, product labels like OEKO-TEX®, the Hohenstein Quality Label and the UV STANDARD 801, as well as transferring the knowledge that we have built up over decades.

On the following pages, you will find out more about our comprehensive range of services that bring your product on the market quickly and safely.

Key Services Hohenstein Hong Kong Laboratory

- **CHEMICAL AND PHYSICAL TESTING**
 - European Standards **EN**
 - International Organization for Standardization **ISO**

SUPPLY CHAIN MANAGEMENT

The OEKO-TEX® Solutions at a Glance.

From chemicals management to environmentally friendly manufacturing processes and fair working conditions, OEKO-TEX® certificates help communicate your sustainability efforts.

ECO PASSPORT by OEKO-TEX® is an independent certification for textile and leather chemicals, colorants and auxiliaries. It is a two-step verification procedure that analyzes whether substances meet specific criteria for a sustainable textile production.

STeP by OEKO-TEX® is an independent certification for environmentally friendly and socially responsible textile and leather production facilities. Certificate owners can transparently document and communicate their sustainable commitment through audited reporting on key performance indicators.

DETOX TO ZERO by OEKO-TEX® enables manufacturers along the textile chain, based on an annual status report, to assess whether their chemical management and the quality of their wastewater and sludge are in line with the goals of the Detox campaign.

STANDARD 100 by OEKO-TEX® is a third-party certification system for textile products at all stages of production, that verifies the item has been tested for harmful substances. Certificates are issued if all components meet the annually updated requirements.

MADE IN GREEN by OEKO-TEX® is a label for textile products made with materials tested for harmful substances, made in environmentally friendly facilities and made in safe and socially responsible workplaces. The product ID or barcode on the label allows consumers to transparently trace product's supply chain.

LEATHER STANDARD by OEKO-TEX® is a third-party certification system for leather articles, at all levels of production, tested for harmful substances. Certificates are issued if all components of the item meet the annually updated requirements.

myOEKO-TEX® enables the management and evaluation of your suppliers along the textile value chain in terms of sustainability. At the same time it facilitates a clear management of existing OEKO-TEX® certificates and your company profile.

The OEKO-TEX® Buying Guide provides a platform for marketing or sourcing certified products or production facilities. This online directory is used by brands, retailers and manufacturers.
